NATURAL GAS & PIPELINE SERVICES

A COMPREHENSIVE SCOPE OF SERVICES

It's rare to find a company that offers the varied and extensive capabilities that Quanta Services considers its modus operandi. From pipelines and gathering systems to meter stations, Quanta Services has deep expertise in natural gas pipeline transmission and distribution as well as petroleum maintenance and construction. The combination of the company's people, expertise and equipment meets the most complex project demands, efficiently and conveniently.

SERVING A CHANGING INDUSTRY

The continued growth of the natural gas industry will generate tremendous activity, development of new pipelines and expansion or upgrades of current systems. An increased need for new pipelines and laterals that serve gas-fired electrical generating plants is unquestionable. With the implementation of new legislative mandates requiring more structured and regular maintenance and monitoring of systems, there has been a sharp increase in demand for new services. Quanta is the nationwide contractor best prepared to enhance the pipeline system to serve these increasing needs.

The U.S. is in need of an estimated 263,000 miles of distribution pipelines and another 38,000 miles of transmission pipelines. Natural gas consumption in the U.S. is expected to rise another 50 percent over the next two decades. Quanta is already involved in the assessment, development, maintenance and expansion of gas pipelines for clients that have an eye toward the future.

PIPELINES, COMPRESSOR STATIONS, METERS, SURVEYS . . . QUANTA KNOWS NATURAL GAS & PETROLEUM

From gas fields to homes and businesses, Quanta delivers solutions for a comprehensive set of needs in natural gas. The company surveys, designs, installs, maintains, repairs and tests for all systems and methods of transmitting natural gas including: transmission and distribution pipelines, gathering systems, compressor stations, and meter stations.

Quanta also provides services for:

- Corrosion protection and rehabilitation
- Permit and right-of-way acquisition
- Directional drilling
- Computer-aided drafting
- Material specifications and acquisition

ONE COMPANY, MANY SOLUTIONS

Electric utilities and gas service companies know to expect superior workmanship and customer service from Quanta. Thanks to a diverse scope of services, Quanta meets any and all pipeline needs. Collective expertise and pooled resources enable Quanta to create and pass on economies of scale. Therefore, gas and pipeline clients save time and money and no longer have to contract with several vendors to complete multi-faceted projects.

Quanta brings the expertise of many companies together to provide innovative and cost-effective solutions. Whether it's a huge design-build project for a natural gas utility company, a small underground installation of a steel gas main or anything in between, Quanta delivers. That is the Power of ONE.

CASE STUDY | TEAMWORK CREATES SOLUTION FOR A COLORADO GAS & ELECTRIC PROJECT

Quanta had recently completed an electric power project for a Colorado energy company when the client approached them with a natural gas project. The project team quickly communicated and coordinated through the Quanta network to secure the appropriate expertise and manpower for the project. The team's fingertip access to an extensive group and ability to act fast delivered the expertise and manpower needed for a job that encompassed two distinct industries. As a result, Quanta and the customer continue to partner through a two-year blanket contract that enlists 19 Quanta crews to install natural gas distribution system and electric power infrastructures. Without Quanta, the customer would have been forced to work with as many as ten different contractors.

Imagine ONE company made up of many teams. Imagine an endless network of specialty contractors whose experience and capabilities are as broad as the needs in the natural gas, electric power, telecommunications and broadband cable industries. Picture ONE company that designs, installs, repairs and maintains infrastructure in all 50 states and Canada. That company is Quanta Services: a company that defines the Power of ONE.
