

the power of

Quanta Overview

Quanta Services Defines the Power of ONE

Prior to the inception of Quanta Services, companies with projects requiring a variety of specialty contracting services had no option but to locate and work with multiple, task-focused contractors. Today, Quanta Services is a single source solution provider for projects in the electric power, gas and petroleum pipeline, telecommunications and cable television industries. Multi-faceted jobs that once required the specialty services of as many as ten different contractors can now be serviced by a single contractor: Quanta Services.

Quanta Services' network of highly respected and experienced specialty contracting companies delivers end-to-end network solutions for the industries it serves. The company performs all aspects of infrastructure support, including design, installation, inspection, repairs, maintenance and testing.

Quanta Services is ONE company with many capabilities.

Primary Industries

- Electric power
- Telecommunications
- Cable television
- Natural gas & petroleum

Primary Network Infrastructure Services

- Design
- Installation
- Repair
- Maintenance
- Emergency response
- Specialty services

Quanta was founded on the vision of creating a contracting team equipped with the resources of the nation's leading contractors, capable of collectively and seamlessly addressing the most comprehensive and complex infrastructure needs. As a team of companies operating with the efficiencies of ONE powerful entity, Quanta has the knowledge and expertise to handle a full spectrum of projects. From the most straightforward, single-component installation to the most complex, multi-state network project, Quanta can handle the job efficiently and cost-effectively.

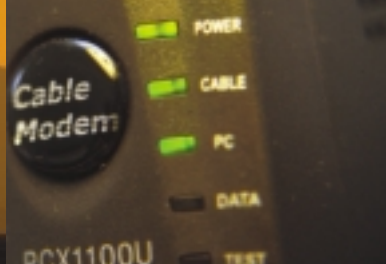

With over 13,000 employees and in excess of 19,000 pieces of specialized equipment, Quanta has principal offices in more than 40 states and operations throughout North America. The company's geographic footprint and the application of its expertise continue to grow as industries merge and customers expand. With an average of 25 years of experience, Quanta's operating units collectively provide an unmatched level of expertise. As a result, Quanta has become known for its ability to provide innovative solutions in a variety of industries, coast to coast.

Quanta is ONE team with many contributors.

The collective expertise, resources and experience of Quanta's diverse group of operating units enable the company to best serve the unique needs of various industries. By bundling specialties, contracting services and industry experiences, Quanta has created a convenient, efficient and unmatched resource for its clients. By working with Quanta, clients increase efficiency, maximize internal resources and develop a competitive edge. In addition, the company's financial stability is a value-added asset to its comprehensive capabilities. Quanta closed the twentieth century as a billion-dollar company and has since more than doubled its revenues. As a publicly traded company on the New York Stock Exchange under the symbol PWR and with bonding capacity well in excess of \$500 million, Quanta's financial strength and stability is an undeniable client benefit.

EXPERIENCE THE POWER OF ONE

In today's world, people want to get it all from a "one-stop shop." They've become accustomed to having multiple needs met by a single, full-service source. And they've discovered that one-stop shopping saves time and frustration. Today, it's all about a single source providing specialized services for a variety of needs. Businesses are quickly learning and leveraging the benefits and efficiencies of partnering with ONE source for many solutions. They have discovered the Power of ONE.

ONE Outsourcing Provider Of Many Services

Quanta's service offerings span multiple industries and represent an unprecedented breadth of expertise. As a result of the company's broad scope of services, Quanta is redefining the concept of turnkey service and leading the trend in outsourcing. As industries ranging from energy to communications discover the benefits of outsourcing select functions to reduce costs, increase efficiencies and focus on core competencies, Quanta delivers the comprehensive outsourcing solutions required for success.

Quanta is capable of handling projects that traditionally required upwards of nine or ten different vendors – thereby providing clients with the convenience of working with Quanta as a single source, multi-solution provider. From A to Z, Quanta's services address the complex needs of the electric and gas utilities, telecommunications and broadband cable industries.

Quanta's broad scope of services, coupled with its expertise, strong customer service mentality and extensive resources make the company a logical outsourcing choice for companies looking to leverage the benefits of one-source contracting for installation, maintenance and repair operations. Specific outsourcing functions available at Quanta include:

- Complete process management, improvements and best practices
- People and equipment utilization
- Access to a skilled, trained workforce
- Facility consolidation
- Synergies in operating areas
- Information systems consolidation
- Materials management
- Call center support
- Engineering and installation
- System operation and maintenance
- Emergency repairs

ONE Company Delivering Many Benefits

Nationwide, Quanta shares a common goal – work together as a unified team and serve customers comprehensively by providing more efficient and cost-effective solutions than is possible as individual service providers. The purchasing power of the company, coupled with the strength of strategic partnerships, enables Quanta to easily meet this goal while maintaining its focus on safety, quality and on-time delivery. Undoubtedly, the unity of the company provides the workforce, equipment resources and diversity of skills to get the job done – quickly, seamlessly and effectively.

The company's diversity and ability to provide complete solutions through design, construction and management of the entire project are reasons why clients choose Quanta time and again. Call it one-stop shopping, call it ONE team with many contributors, ONE provider of many services or ONE source with many solutions. **Quanta calls it the Power of ONE.**

With ONE contact Quanta provides many connections. From ONE source, Quanta offers many solutions. That is the power of Quanta. That is the Power of ONE.

Electric Power & Energized Services

Quanta Is An Electrical Services Powerhouse

Quanta's electric power transmission, distribution and substation services are powered by the experience and reputation of some of the most respected electric service contractors in the industry. By bringing this expertise together, Quanta provides A to Z services for traditional utilities, investor owned utilities, federal, state and municipal agencies and independent power producers.

Transmission: Regardless of the part of the country or the terrain, Quanta's electric power service teams have the expertise and equipment to efficiently install and maintain a few hundred or several thousand miles of transmission line and construct tower networks that include up to 765 kV triple bundle lattice steel towers.

Distribution: Quanta is a prime resource for installation and maintenance of all types of distribution facilities including overhead construction, underground network services, live-line maintenance and new plants. Services range from civil work for underground facilities to power control cable pulling, splicing and testing.

Substations: In addition to handling control wiring, equipment testing, bus welding and many other facets of substation work, Quanta provides turnkey design-build services for 69 kV to 500 kV substations. From site preparation and foundations to construction and energization, Quanta provides complete substation services.

Energized Services: Quanta can maintain, upgrade or rebuild any voltage line or any facility – without interrupting power service. Recognized as an industry leader in electrical energized services, Quanta is the only licensed operator of the LineMaster™ robotic arm. Extensive training and experience in barehand techniques and hotstick technology allow the company's crews to maintain live lines and to provide energized reconductoring services.

Emergency Restoration: For the power industry's most extreme circumstantial needs, Quanta's emergency restoration crews are prepared to provide immediate, around-the-clock service. Clients find the company's extensive workforce, equipment resources and responsiveness to be invaluable in emergency situations where fast and efficient response is critical.

Quanta's electric power transmission, distribution and substation services are powered by the experience and reputation of some of the most respected electric service contractors in the industry.

Telecommunications & Wireless

Quanta Connects Telecommunications Technologies

In the telecommunications industry, Quanta is equipped to provide an unparalleled scope of services cost-effectively and efficiently. The company not only configures telecommunications networks, but also provides the services to design, install, operate, test and maintain them. Quanta is taking fiber optic cable across the country, through mountains, valleys and prairies to businesses, buildings and homes, telephones and modems. From route selection to positioning of the product, Quanta's telecommunications network services cover projects from start to finish.

Outside Plant Services — Overhead and underground, Quanta's outside plant services include:

- Plant design, engineering and construction drawings
- Right-of-way acquisition and permitting
- Overhead and underground installation, maintenance and repair of fiber optic and copper cable
- Cable splicing and testing

Inside Plant Services — Starting with plant design, construction drawings and permitting, Quanta's inside plant services encompass all elements of network integration. From riser installation to horizontal cabling, pathway construction and ongoing maintenance including installation, cable splicing and materials procurement, the company's inside plant services are capable of serving single or multiple site needs.

Central Office — Quanta's central office services cover complete engineering, furnish and install (EF&I) needs nationwide. Quanta installs equipment designed by the industry's leading manufacturers. In fact, the company is certified to install virtually every piece of equipment telecommunications customers require.

Wireless — From monopole erection to orientation and sweep testing, Quanta provides wireless clients with design, build and maintenance services as well as data transmission, project management and all the permitting processes associated with construction. Quanta crews construct cellular, digital, PCS, microwave and other wireless telecommunications towers and mobile telephone switching offices.

Quanta's all-encompassing mix of telecommunications services is unmatched. Thus, working with Quanta eliminates the need to hire a right-of-way acquisition firm, a telecommunications engineering firm, an environmental engineering firm, a construction firm, a central office engineering firm and an electronics installation firm. Quanta can manage it all.

Quanta is taking fiber optic cable across the country, through mountains, valleys and prairies to businesses, buildings and homes, telephones and modems.

Broadband Cable & Natural Gas

Quanta's full range of capabilities eliminates the hassle and expense of working with multiple contractors for broadband cable network and natural gas projects.

Broadband Cable Services Give Quanta The Edge

The Quanta team unites many capabilities in broadband services, including broadband system design for voice, video and data transmission networks. In response to the growing demand for bundled services such as power, telecom and cable, Quanta has proven itself as the full-service solution provider to help cable companies, RBOCs and others design, install and maintain their coaxial, fiber optic and hybrid systems as industry needs evolve. In fact, Quanta's services support even the most advanced technology including frame relay, SONET, Dense Wave Division Multiplexing (DWDM) and MPEG.

Quanta designs, builds and maintains all types of networks, including DSL, ADSL and HDSL, video-on-demand, voice over IP and full headend facilities. Quanta has the expertise, experience and manpower to upgrade power infrastructures for residential and commercial cable installations. The company is recognized as a leader of installation for cable TV, broadband, and high speed Internet services. Quanta's full range of capabilities eliminates the hassle and expense of working with multiple contractors for broadband cable networks.

Quanta Is Prepared For Growth In Natural Gas & Petroleum

Quanta stands ready to enable its customers to meet the increasing demand for natural gas, which is expected to triple in use over the next 20 years. As ONE source for natural gas and pipeline contracting services, Quanta is the nationwide contractor best prepared with the expertise, people and equipment required to enhance the country's pipeline system.

From well fields to homes and businesses, Quanta designs, installs, maintains, repairs and tests gas systems. For transmission and distribution pipelines, Quanta provides gathering systems, compressor stations, meter stations, corrosion protection and rehabilitation, permit and right-of-way acquisition, material specifications and acquisition, surveying, directional drilling and computer-aided drafting.

From large transmission and distribution projects to installation of valves and gas mains to petroleum pipeline maintenance and construction, Quanta's clients enjoy the convenience and cost efficiencies of our collective scope of services.

Specialty Services

Quanta's Specialty Services Reflect Broad Expertise

Quanta's breadth of industry coverage and complete service scope make the company an effective and efficient choice for specialty contracting services. The depth and variety of the services Quanta delivers within each industry it serves provide clients with unsurpassed added value. The Power of ONE means clients can rely on Quanta's solid credentials in even the most specialized service sectors. Quanta provides:

- Emergency restoration and railroad response
- Pipeline transfer and bulk storage facilities
- Intelligent traffic networks including signals, controllers, message signs and closed circuit monitoring
- Light rail tower installation, specialty wiring and ground wires
- Piping, tankage and control for airport fueling systems
- Wind generation facilities
- Rock trenching, directional drilling and road milling
- Cathodic corrosion assessment and rehabilitation
- Vegetation control and tree trimming

Put the Power of ONE to Work

For local, regional or national projects that involve multiple disciplines or multiple locations... For a scope of services and specialized expertise as broad as the project needs... For electrical services, telecommunications, broadband cable or natural gas and petroleum pipeline projects... For assurance that the resources, equipment and people are in place to get the job done efficiently and effectively... For the convenience of a full-service one-stop shop... For an upcoming project: Quanta. Quanta delivers the Power of ONE. That is, many connections with ONE contact, ONE team with many contributors and many solutions from ONE source.

The depth and variety of the services Quanta delivers within each industry it serves provide clients with unsurpassed added value.
