## WIRELESS SERVICES

### A COMPLETE SERVICE OFFERING FOR TODAY AND TOMORROW

Quanta Services has the people, expertise and equipment to serve the most diverse wireless projects without subcontracting for additional resources. In fact, the Quanta Services team offers an unmatched history, depth and range of wireless expertise. Quanta Services' scope of services is A to Z, no different from our customers' needs – varied, complex and highly specific.

From monopole erection to orientation and sweep testing, Quanta provides a complete scope of services for wireless clients including design, build and maintenance. Quanta crews construct cellular, digital, PCS, microwave and other wireless telecommunications towers – as well as cover project management and all of the engineering and permitting processes associated with construction. The company's complete service offering includes locating favorable site locations based on radio frequency engineering, obtaining zoning and other approvals from local government, completing final plans, performing site audits and conducting follow-up testing as necessary.

As the wireless industry faces change, Quanta's reputation for complete wireless service has moved the company to the center of emerging technologies. In fact, Quanta is already building satellite radio infrastructures. Also, providers of third generation (3G) services are counting on Quanta to build the infrastructure that is bringing high-speed multimedia access to cell phones and other wireless hand-held devices.

### THE BENEFITS OF ONE

Major telecommunications companies including manufacturers, long distance network companies, telephone operating companies, wireless service providers, as well as the public sector recognize Quanta's extensive training, emphasis on safety and expertise differentiate it from the competition. However, it's the cost efficiency and convenience of working with Quanta that clients value most. With Quanta it isn't necessary to coordinate with numerous contractors to complete a job. ONE call to Quanta brings a team of specialty contractors ready to successfully complete the project, on time and on budget. That is the Power of ONE.

### CASE STUDY | A STEALTH CELL TOWER HIDES IN AN OLD VILLAGE CHURCH

An old, quaint church sits in the heart of the New England countryside. In fact, Neshanic Reformed Church's stone walls and steeple date back to 1775, the year Paul Revere braved his midnight ride. But more than 200 years later when the small church's steeple was about to collapse – and the growing rural area needed a cell tower to meet modern needs, Quanta rode to the rescue. Responding to its client's need to eliminate a dead zone of cell service, Quanta installed a "stealth cell tower" in a rebuilt, but identical, steeple for the historic church. The job started at Thanksgiving and was finished in three weeks – just in time for Christmas Eve services.

Think of Quanta Services as ONE company made up of many resources – an expansive network of specialty contractors with the services and expertise as broad as the industry's needs. ONE company that designs, installs, repairs and maintains infrastructure. Operating in all 50 states and Canada, Quanta Services fulfills any customer demand for specialty contracting services in the telecommunications, electric power, broadband cable and natural gas industries. That is the Power of ONE.
